MBA IN LEADERSHIP AND SUPPLY CHAIN MANAGEMENT

STUDY PART-TIME IN HAMBURG, GERMANY
SEPTEMBER 2020 – MARCH 2022
WELCOME FROM THE ACADEMIC DIRECTOR

DEAR PROSPECTIVE STUDENTS,

We look forward to being a part of your leadership and lifelong learning journey, assisting you in achieving your future career goals. KLU Executive Education enables its graduates to continue their professional journey with the skills and knowledge that sets them apart from others.

As a student in our Masters of Business Administration program, you will be exposed to what it takes to lead in a modern global business. The program focuses on the four most important dimensions of global business: strategic, organizational, product/service, and operational dimensions. Class discussions, readings, case analyses, simulations, and role-playing allow our students to understand the complex dynamics of leading a global organization in today’s volatile marketplace. Using the supply chain as the organizing principle for global operations, we prepare our students for leadership roles in the organizations in which they work. Our international study trips bring the topics being taught in class to life as the students are exposed to how business actually works in China and the United States. The final capstone project allows each student to apply what they have learned through their class work to a practical problem of importance to themselves and their employer.

While the academic component of the program is a necessary part of any student’s learning journey, it is the relationships that the students develop with one another and their professors that contribute to the lifelong value of the program. Learning from professionals with differing backgrounds and experiences enriches classroom dialog and adds context to the lecture topic. The need to work closely with their classmates creates strong friendships that continue well beyond each student’s graduation.

Outside the classroom, students can enjoy the vibrant city life of Hamburg. The second largest city in Germany, Hamburg offers an international lifestyle with many distinct neighborhoods to explore. Located directly in Hamburg’s HafenCity, the KLU campus offers a unique environment with breathtaking port views just steps away from the landmark Elbphilharmonie concert hall. We look forward to sharing the KLU Executive Education experience with you!

Yours Sincerely,

Prof. Dr. J. Rod Franklin, P.E.
Managing Director and Academic Director
KLU Executive Education
A GREAT PLACE TO STUDY

ABOUT KLU

KLU offers world-class BSc, MSc, MBA, and doctoral programs in logistics, supply chain management, and management.

We are an international research university where all our courses are taught in English. At KLU, you will experience an international student body, outstanding faculty, an intimate learning environment, and benefit from extensive corporate ties. Enjoy the advantages of a private university: instruction in small groups, a favorable student-to-faculty ratio, easy access to important contacts, modern infrastructure, and a comprehensive range of services.

In addition to the positive learning environment, you will be able to enjoy the cosmopolitan city of Hamburg, which is the central business hub for Northern Europe and home to Germany’s largest port.

The city features a broad cultural spectrum and is popular among students. The nightlife in Hamburg is diverse, the city is a venue for fabulous festivals, and offers everything from relaxing cafes to trendy bars in a variety of districts, each with its individual flair.
Kühne Logistics University is dedicated to teaching and research in logistics and supply chain management as a core element in global organizations. We are committed to providing quality degree programs for students and executive programs for logistics professionals to become global leaders in supply chain operations and management. If you are looking for an executive perspective, access to a top international faculty, immediate practical applicability and a chance to network with other practitioners, you will find our MBA an exciting educational experience. The 18-months part-time program allows students to continue to work in their organizations while pursuing their degree and preparing themselves for increasing responsibilities. The students also bring their current and prior experience into the classroom to enrich their own as well as fellow students’ learning experience.
# FACTS AND FIGURES

| Duration            | · 18 months  
|                    | · Part-time  
| Language            | · English  
| Structure           | · Four-day block seminars (Friday – Monday) on campus once a month for 13 months. Each month two courses will be covered.  
|                    | · One month summer break  
|                    | · Five months Master Thesis (capstone project)  
| Tuition fee         | · € 29,750 (includes teaching materials, excludes travel expenses).  
| Important dates     | · Start of application period: November 1, 2019  
|                    | · 10 % “Early Bird” discount deadline: February 29, 2020  
|                    | · Recommended application deadline, non EU applicants: March 31, 2020  
|                    | · Application deadline: July 31, 2020  
|                    | · Scholarship application deadline: July 31, 2020  
|                    | · An attendance of around 35 working days (Fridays and Mondays) is required throughout the program. Student’s attendance for all block seminars and the two study trips* is required.  
| Documents required for application | · You will find all required application documents in our online application portal.  
| Admission requirements | · A bachelor’s degree with 240 ECTS or equivalent from a recognized university or college. Admission on the basis of 180 ECTS is possible. If this is the case, please get in touch with us. * International study trip to Tongji University Shanghai, China

** International study trip to Fisher College of Business, the Ohio State University, U.S.A.

13 months course work (12 four-day weekend sessions plus two international study trips)
September 2020 – October 2021
5 months capstone project (Master Thesis) November 2021 – March 2022

Please check online for the academic calendar: www.the-klu.org/mba
Our MBA in Leadership and Supply Chain Management is a hands-on program composed of team-based learning. It focuses on training you to become a leader that creates true, sustainable value for your organization, your society and yourself. The program is an eighteen-month long part-time program mixing classroom work with projects. Two international trips are integrated into the curriculum to provide you with background information on how other cultures learn and work. A capstone project (thesis) based on a real-world problem of importance to you and your employer integrates the knowledge developed throughout the program and provides you with a transition from learning to actual practice.

The program is composed of nine modules, including the capstone project. Over the course of the program, the contents of the modules move along the lines of a broad strategic perspective to focusing on more detailed, tactical issues in operational management. As such, they cover all subject areas of business administration. The courses delivered align with KLU’s key competence areas Value Creation, Sustainability and Digital Transformation.
CREATING VALUE

Competing on a global scale requires an understanding of how global markets operate and how competitors in these markets compete. Proper organizational structure and leadership are necessary if a global strategy is to be effectively implemented and for sustainable value to be created for stakeholders. KLU’s MBA provides students with the tools, leadership skills and financial practices necessary to develop a sustainable corporate strategy and to implement an organizational structure that supports this strategy.

Furthermore, long-term value creation only occurs if an organization can consistently develop new and valuable products for their customers and society. KLU’s MBA teaches students how to develop new products using processes and procedures that are driven by “voice of the customer” marketing and sales activities.

SUSTAINABILITY

Organizational activities do not occur in an isolated manner. Operations impact the workers who perform the work, the society in which the work is performed, the environment and all stakeholders from owners to customers. To create consistent and sustainable value requires leadership not only in the technical areas of operations management, but also in the areas of socio-economic sustainability and human resource leadership. KLU’s MBA teaches students effective and efficient operations techniques concerning green and lean operations and how to engage the hearts and minds of employees by leading through listening, so that their organizations create long-term, sustainable value.

DIGITAL TRANSFORMATION

Today’s businesses find themselves at the heart of a vastly growing and dynamic network of information. To ensure that an organization can sustain a value proposition for customers and society over the long-term requires the continual reevaluation of information relevant for business activities and keeping up with the newest developments in digital technologies. Students of KLU’s MBA program learn how to use information systems in an integrated way to support fact-based decision making, interact effectively and efficiently within their organization as well as with partners, customers and other stakeholders and thus ultimately enhance the organizations’ competitiveness on a global scale.
The Ohio State University is one of the largest universities in the United States, who has delivered custom corporate education programs since 1955. It is also home to a diverse group of the best and brightest people in the world: dedicated faculty, passionate students, and innovative researchers who make Ohio State one of the world’s truly great universities.
In this unique one-week program at the Ohio State University, participants will learn how to deal with the challenges of designing a supply chain that minimizes risk, carbon emissions, costs and transit times. Topics such as contracting with suppliers in an international business, procurement strategies, negotiation skills, and effective relationship management are all covered within the residency module. During an exciting week at one of the biggest campus universities in the US, you will participate in lectures and workshops taught by renowned and outstanding professors of the Fisher College of Business, The Ohio State University. The lectures will be complemented by on-site visits to well-known businesses in and around Columbus as well as a social program.
“The study trip to China was a great multicultural enriching experience that on the one hand expanded my knowledge about the country’s vision of the world and on the other hand took me to an advanced level of how to deal with other cultures and situations personally and professionally.”

Perla Vazquez, Student MBA in Leadership and Supply Chain Management, Class of 2019
Tongji University is one of the leading universities directly under the State Ministry of Education in China. It offers degree programs both at undergraduate and post-graduate levels. Together with the School of Economics and Management at Tongji University, the Kühne Logistics University is offering a unique one-week program on sustainable supply chain operations. You will learn to identify waste in their operations, implement improvements that eliminate this waste, and manage their operations to ensure that they meet the sometimes conflicting demands of senior management, investors, regulators, customers, and society.

During an exciting week in the Chinese metropolis Shanghai, you will participate in lectures and workshops jointly taught by renowned professors of the Kühne Logistics University and the Tongji University. The lectures will be complemented by on-site visits to well-known businesses in and around Shanghai as well as a social program. During the study trip, you have the opportunity to learn from the best in the field and network with professionals from around the globe!
YOUR PATHWAY TO SUCCESS

EARNING THIS MBA HAS MANY BENEFITS FOR YOU AND YOUR EMPLOYER

Completing this program, you will acquire practical knowledge and skills enabling you to:

• Take on leadership roles in global businesses having complex international operations;
• Develop effective corporate and supply strategies to compete in complex international settings;
• Develop the ability to analyze complex business problems and to effectively apply management practices and principles to these challenges;
• Understand complexities of intercultural cooperation to ensure effective interaction with international subsidiaries and partners;
• Leverage the creative energies of yourself and your colleagues to create innovative solutions to global operational issues that are both sustainable and profitable.

OBJECTIVES

• Preparation of professionals for leadership roles in global logistics operations
• Development of intercultural, leadership and supply chain domain skills
• Development of organizational, financial, and decision making skills to prepare individuals for higher managerial positions

“This program was the next step in developing my leadership character and considering it from a global perspective for future growth within my company. The program helps you to look at your work, yourself, and your group interaction from a different perspective.”

Alena Addington-Barker,  
Student EMBA Leadership & Logistics,  
Class of 2017

“The program covers a wide range of topics that will foster the soft skills you need to become a great leader and professional. Completing such a program also challenges you on different levels; coping with work, travel, school and life balance. The international environment and small classes make it possible to have enriching discussions.”

Marisol Henschen,  
Student EMBA Leadership & Logistics,  
Class of 2018

“The MBA at KLU has a clear focus on Leadership and Supply Chain Management. The combination of theory and practical case studies provides students with a variety of instruments to solve everyday business challenges. I was particularly impressed by the expertise and dedication of the professors, which proved to be extremely motivating. The international character of the program including the study trips created a real added value.”

Julian Böcker,  
Student EMBA Leadership & Logistics,  
Class of 2016

“Thanks to the MBA program at KLU I’ve started to change my life – professionally in my career and also in my private life. The intensive exchange during this international program has changed me, teaching me new hard skills but also critical thinking and an open-minded approach to everything.”

Mariusz Rutowicz,  
Student MBA in Leadership and Supply Chain Management  
Class of 2019

“The set-up of the program allows me to continue my professional career while enhancing my educational knowledge, leading to faster know-how transfer. The professors are motivating and the participants benefit from a wide range of international experiences.”

Markus Nowc,  
Student EMBA Leadership & Logistics,  
Class of 2017

“For the business world and private life, the program provides its participants the needed knowledge and skills to build their own strategies, to form their own views and tackle difficult decisions and complicated situations. The experience is worth it.”

Diaa Mansour,  
Student EMBA Leadership & Logistics,  
Class of 2018
International managers can take part in several programs organized by KLU’s Executive Education Department. We offer open enrollment seminars, corporate training programs, an International Summer School in Supply Chain and Logistics Management and an MBA program in Leadership and Supply Chain Management. In addition, KLU’s Executive Education organizes university residency modules. The open enrollment seminars are designed to ensure the best learning experience for participants, enhancing their knowledge on a specific topic.

As of 2019, KLU has added two certificate programs to its Executive Education scope, that have been developed by the Kühne Foundation: The NetloP program - Network Management for Logistics Processes - (language: German) is held in cooperation with renowned universities throughout Germany, Austria and Switzerland. The ENLoP program - European Network Management for Logistics Processes - (language: English) is carried out at outstanding academic logistics centers in Europe. Both programs provide compact logistics knowledge and are aimed at experts working in the area of supply chain and logistics, as well as project management.
For companies wishing to dive deeper into a given topic, KLU offers corporate training programs. Tailored to fit the specific needs and requirements of a company, these programs cover cutting-edge topics, current developments and industry trends in logistics, supply chain management, leadership and management. Our Executive Education Department works with company representatives to construct a tailor-made program that will meet all expectations.

KLU’s International Summer School in Supply Chain and Logistics Management is being offered annually. The 12-day program includes lectures by internationally renowned professors, executive workshops by practitioners, and on-site excursions. Participants develop a comprehensive understanding of logistics and supply chain processes and enhance their managerial skills.

As part of the customized programs, KLU also hosts residency modules for partner universities. As part of these, we have welcomed students from all around the world to Hamburg.

Find out more about the benefits our programs can bring to you and your company on our website under Executive Education. We will gladly discuss opportunities for training programs and benefits for your company personally.
SEE YOU AT KLU

Why don’t you come and visit us on campus? You are welcome to arrange a personal meeting with our professors, staff or students – they will all be pleased to show you around or tell you about our projects, the KLU portfolio, our industry liaison and student life at KLU.
